First-aid measures general:

## Safety Data Sheet

Take proper precautions to ensure your own health and safety before attempting rescue and providing first aid. Consult a physician and show this safety data sheet with the physician in attendance. Move out of dangerous area.

### **First-aid measures after inhalation:**

If affected, remove to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration.

### **First-aid measures after skin contact:**

Immediately remove contaminated clothing and shoes. Wash the affected area with plenty soap and water until no evidence of the chemical remains (at least 15-20 minutes). Launder clothing before reuse. Seek medical attention if symptoms occur.

### **First-aid measures after eye contact:**

Immediately flush eyes with copious amount of clean water for an extended time (not less than 15 minutes). Flush longer if there is any indication of residual chemical in the eye. Ensure adequate flushing of the eyes by separating the eyelids with fingers and roll eyes in a circular motion. Seek medical attention if irritation develops or persists.

### **First-aid measures after ingestion:**

Do not induce vomiting. Call a physician or poison control center immediately for further instructions. Never give anything by mouth to an unconscious or convulsing person. Rinse out the mouth with water. Get medical attention immediately.

#### **Fire hazard:**

## Safety Data Sheet

The product is a flammable liquid with accompanying flammable vapor. Keep containers tightly closed. Isolate the product from heat, electrical equipment, sparks, open flame and other sources of ignition. In this case fog nozzles are preferable.

### **Explosion hazard:**

Closed containers may rupture when exposed to extreme heat.

### **Reactivity:**

During a fire, irritating and or toxic gases and particulate may be generated by thermal decomposition or combustion.

### **Advice for firefighters**

#### **Firefighting instructions:**

Use water spray to keep fire exposed containers cool.

#### **Protection during firefighting:**

Wear self-contained breathing apparatus (SCBA) equipped with a full face-piece and operated in a pressure demand mode (or other positive pressure mode) and approved protective clothing. Personnel without suitable protection must leave the area to prevent significant exposure to hazardous gases from combustion, burning or decomposition. In an enclosed or poorly ventilated area, wear SBCA during clean up immediately after a fire as well as during the attack phase of the fire-fighting operations.
